# Curricu

The classrooms have been transformed into War and Conflict inspired rooms and we have lots of exciting things planned for this term. We are ready to take on our mission and explore our theme of War and Conflict. Everyone has returned with a positive attitude and is eager to learn. Lots of children have enjoyed learning our previous themes and we hope that this theme will be as successful. We thank you again for your support in helping your children with their homework, times tables and reading.

**Mrs Corr and Mr Hunter**

## **Our Learning Overview**

English -diaries, short narratives and recounts

Maths - place value, negative numbers and formal methods of calculation

## **Autumn Theme**

During our theme of War and Conflict' the children will study a range of topics linked with past conflicts as well as current conflicts around the world. In our topic lessons we will look at different countries around the world and how people move from different countries. As it is 100 years since WW1 we will also focus on this in lots of areas and produce writing linked with this.

As scientists we will study the human body and how it works! We will visit Bletchley Park museum and think about how important this site was in the past In computing we will look at coding and creating our own games.
